PITCH STEP 01 / 04

THE SOLUTION

Creators get paid by fans directly. Fans stay private.

- ▶ Private tips: USDC to a creator, sender and amount stay hidden.
- ▶ Private memberships: fans prove they belong without showing their wallet.
- ▶ Private crowdfunding: donations and rewards only, no returns.
- ▶ No content hosting. No platform in the middle that can switch it off.

Creators keep their income. Fans keep their privacy.

PITCH STEP 02 / 04

PMF

Deplatformed creators lose their income overnight.

- The money sits on platforms they do not control. One ban and payouts stop.
- Fans want to keep paying them. On a public chain every payment shows who paid whom.
- For a controversial creator or a fan with a job to protect, that is a real risk.
- Backstage serves both sides: creators who need a channel and fans who need privacy.

Losing a platform should not mean losing your income.

PITCH STEP 03 / 04

TECHNICAL WORKFLOW

Soroban, USDC and ZK proofs on Stellar.

- ▶ Creator sets up a membership tier in a Soroban contract.
- ▶ Fan pays in USDC. Open mode settles as a normal Stellar payment.
- ▶ Private mode: fan gets a membership proof built with Poseidon and BN254.
- ▶ The contract verifies the proof on-chain. Access is granted, identity stays hidden.

Fees under a cent. Settles in seconds. Proofs verified on Stellar.
